

Oil Flux Americas uses new chemistry to solve 15 common pain points shown below ...

EVERY DROP COUNTS.

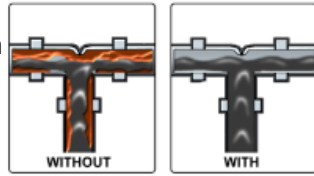

... so don't choke your profits, instead lower your costs while increasing efficiency, productivity and safety: see how at www.oilfluxamericas.com

OilFlux™ New Chemistry Specialty Oil Field Production Additive Products

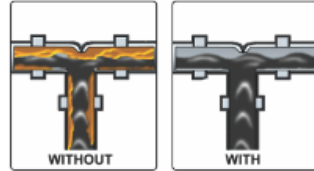

W10 Fluidifier & DRA (Drag Reducing Agent) incorporates into & does not evaporate from crude oil mass - powerful.

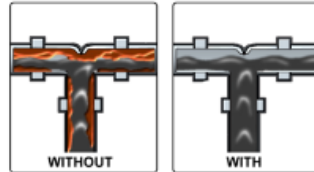

W20 Fluidifier & DRA & Demulsifier - more powerful.

W30 Tailored Fluidifier & DRA - most powerful.

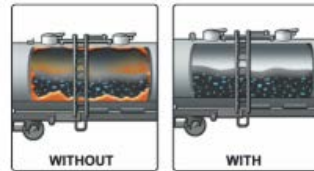

WPF Paraffin Separator & Fluidifier & DRA of crude oil mass.

WAS Asphaltene Inhibitor & Fluidifier & DRA of crude oil mass.

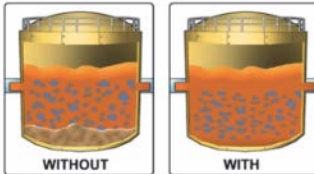

BTI Cleans & Recovers crude oil residuals from all types of tanks & sea/truck/rail tankers.

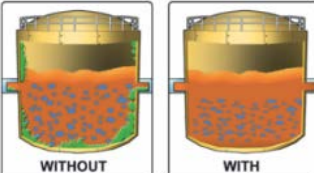

BTI Anti-Crude Oil Spill cleaning, recuperation & recovery of crude oil from aquatic environment, soils, marine life, plants & animals.

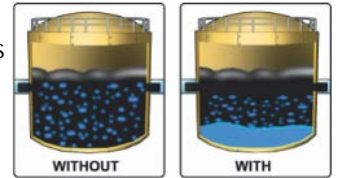

BFO Fuel-Oil Performance Additive eliminates residual lumps in fuel oil tanks, reducing possibility of plugging of filters & injectors.

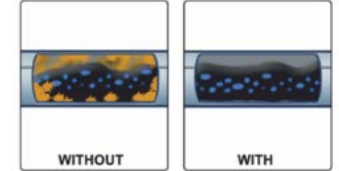

BVM Gas-Oil Performance Additive prevents growth of algae & formation of mucilage in tanks, commonly called "gas-oil snot".

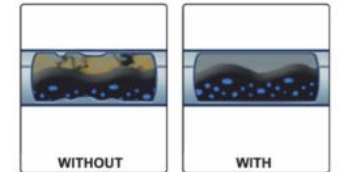

SWO Demulsifier separates water from "water/crude oil" emulsion & reduces sediments in crude oil mass.

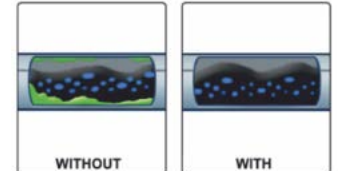

SBH Anti-Embedment prevents incrustations from water due to very high dissolved salts in crude oil.

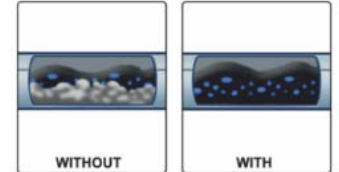

SCA Corrosion Inhibitor protects pipe from corrosion caused by water.

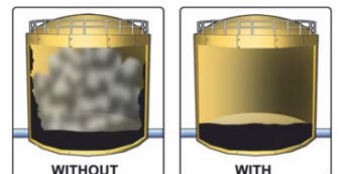

SCF Bactericide when added to crude oil gets rid of bacteria produced by water.

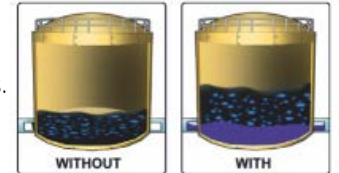

S16 Anti-Foam prevents formation of foam while cleaning all types of tanks/ tankers.

SH2 Sequestering decreases reaction of sulfidric acid (H2S) to form sulphuric acid (H2SO4).

P50 Recuperation & Recovery & Water Separation of all crude oil from ponds/pits/tanks.
